### Comments received during Hickory Solar Permit By Rule Public Meeting

The meeting was attended by two community members and one representative each from Caden Energix Hickory LLC and Timmons Group. A general discussion of the Hickory Solar project and trends in solar development occurred during the meeting. A summary of discussed topics is included below.

Questions/Comment	Response (if applicable)
Is the project surrounded by active agricultural fields?	Yes
Will there be cameras within the Site?	Probably, but TBD
Do solar panels need to be washed?	Probably not given natural rainfall, except possibly during plowing season
Will road improvements be scheduled on Ballantine Road?	The existing road will be used for access
Panels produced by First Solar are in use at Naval Air Station Oceana located adjacent to the project.	Correct. Hickory Solar hopes to use the same thin-film technology
Atmospheric haze from the ocean has the possibility to limit efficiency of solar production.	Efficiency rates have been calculated for this project based on local data

No written comments were received.
