Re: [REDACTED]

April 4, 1950

b7E

Inquiry at 510 West 112th Street, New York City, revealed that Apartment 8-A received mail from an organization, the name of which is inserted in the inside of the mail box, which the letter carrier opens at the time he delivers mail.

Inquiry of the mail carrier revealed that the organization to which the mail is addressed is known as the ~~Histraduth~~ (probably ~~Histabruth~~) Palestine Campaign.

Indices of the New York Office reflected that the Histabruth Palestine Campaign was a fund raising campaign for the Jewish people in Palestine.

Reference is made to the report of SA PAUL J. TIERNEY dated January 30, 1950 at Washington, D. C., re [REDACTED]

The delinquency report covering this desk for the week ending February 17, 1950, showed an estimated delinquency of 15 man days. The total estimated delinquency as of March 16, 1950, is 19 man days. This represents an increase of 4 days during a period covering 19 work days.

Judging by the present situation, it is felt that if one additional supervisor is assigned to assist in the handling of matters on this desk, the desk can be brought to a current status in about two months' time provided the new supervisor has experience in handling espionage and foreign intelligence cases. If the new supervisor is inexperienced in these fields, it is believed that about three months will be required to place the desk in a current status.

ACTION:

It is therefore recommended:

1. That these [redacted] matters be handled as a special both in the Espionage Section and in the field.

2. That additional supervisory personnel be assigned to the desk in the Espionage Section handling [redacted] matters.

ReBulet to Washington Field Office April 25, 1950.

For the information of the New York and Los Angeles Offices it may be noted that on December 18, 1949, a confidential reliable source made available to Agents of the Washington Field Office

An examination of the above described "A" report and its attachment revealed that the attachment had apparently originated from the United States Department of State.

On April 26, the Bureau was successful in securing through

State Department records reveal that the document attached hereto received the following distribution:

Three copies to the Office of Transport and Communications Policy, Department of State.

Two copies to the Division of Foreign Reporting Services, Department of State.

Two copies to the Near Eastern, South Asian and African Affairs Section of the Department of State.

Eleven copies to the Office of Libraries and Intelligence Acquisition, Department of State.

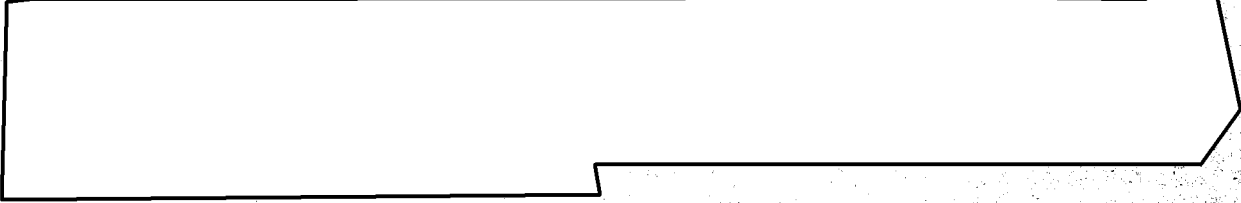

Eight copies to the Department of Commerce.

Three copies to the Civil Aeronautics Board.

You will note that a total of twenty-nine copies is accounted for above.

State Department records reveal that thirty-one copies of the document were ordered to be reproduced on September 20, 1948. The other two copies are not accounted for in State Department records.

The Los Angeles and New York Offices are being furnished with copies of this letter and its attachment for inclusion in their files

b7D

The attention of the Washington Field Office is called to the fact that a considerable portion of the information contained in the various "FA" reports which have come to light to date, seem to pertain to aviation matters. This fact may or may not have some significance.

In considering the question where the individual who prepared the "FA" report may have secured a copy of the attached document it may be well to note that the Bureau has learned informally through liaison channels that the fact that a copy of a particular document is not designated for an outside intelligence agency does not necessarily mean that agency did not have access to the document. In other words, you will note that the

State Department did not designate copies of the attachment for either [redacted] It is still possible, however, that representatives of one of these four intelligence agencies may have had access to a copy of the document since it apparently has become a common practice for researchers within the various intelligence agencies to pass information back and forth on an informal basis.
